Covid-19 Pandemic Update

Sanitary Precautions

Sycor-Team

March 17, 2020

Subject: COVID-19 Update

Dear Customers & Manufacturers:

The Sycor team has always made it our mission to provide quality products for cost-effective pricing. As 2020 gets underway, we've come to the realization that this won't be a typical year. With Covid-19 spreading at an unprecedented pace through the east and now slowly through the west, we wanted to assure our customers that we will continue to be open for business while taking extra sanitation precautions.

We understand that everyone is on edge, and we want to assure everyone that we are making the safety of our clients, vendors, and employees our number one concern. We've begun adding additional precautions to make sure everyone is operating safely, from manufacturing to shipping.

With operations temporarily shutting down around the globe, we are making sure everyone knows that we are taking every effort to ensure all shipments are sent out and received at their respected times. Contact us to address any concerns or to advise us of any restrictions on shipping/receiving for your operation.

Best Regards,
The Sycor Team
